SUMMARY

Information Science undergraduate who builds ML and automation systems and takes them all the way to production. Hands-on with LLMs, agent workflows and computer vision, and most interested in automating work that people shouldn't be doing by hand. 15+ national and international hackathon wins.

Core Strengths: Automation · Machine Learning · LLMs & Prompt Engineering · Agentic & RAG Systems · Computer Vision · Python · Java · SQL

WORK EXPERIENCE

Incoming Intern, Fidelity Investments

Upcoming

- Selected through campus placement for a two-month internship.

AI Systems Developer, LessonPlan

Nov 2025 to Present

- Build and ship AI features for an EdTech platform: ML pipelines, agent workflows and RAG.
- Own model serving, CI/CD and monitoring in production.

Lead Developer, GyanEdge (Part-Time)

Mar 2025 to Present

- Lead development of a real-time online assessment platform on Supabase, from research and design through testing and release.

QA Engineer, OpenInterview (Intern)

May 2025 to Jul 2025

- Tested a live LLM interview platform for accuracy and consistency; wrote automated test plans and tracked latency.

PROJECTS

Outsurance: AI Health Insurance Advisor

[live](#) | [code](#)

- A local LLM (Gemma 3) reads unstructured medical history and scores severity, replacing hardcoded rules.
- That score became the top feature (24% importance) in an XGBoost risk classifier (4 tiers, 85% F1, SHAP explanations). A Cosine-KNN ranker then returns the top 5 plans.

GARUDA: Edge AI for Road Safety

[live](#) | [code](#)

- Fine-tuned YOLOv12s on RDD2022 (5 road-damage classes) and built a Damage Severity Score. Regression over past scores forecasts when a road will fail.
- Runs on the edge over existing CCTV and dashcam feeds and sends about 2 KB of JSON instead of video, cutting bandwidth by 99%. Also added YOLO11 with ByteTrack, EasyOCR plate reading and MediaPipe drowsiness detection.

Sparsh Mukthi: Voice-Driven 3D AI Classroom

[live](#) | [3D demo](#) | [code](#)

- Students can interrupt the AI teacher mid-lesson. Routes between Gemini, Claude and GPT-4o with strict JSON output.
- Serves Orpheus-TTS (3B) voices through FastAPI and runs MediaPipe in the browser for hand-raise and attention tracking.

ACHIEVEMENTS & HACKATHONS

Winner, Fidelity Investments India Hackathon 2026

National, Rs 1,50,000

Winner, Infinity Code Hackathon

International, \$25K Cloud Credits

Winner, Hack-Aventus 3.0 (24-hour National Hackathon)

Rs 1,00,000

Community Favourite, Google Maps Platform Awards

International

Further wins: Hack Academia (2nd), Pragyan Ideathon (3rd), Omnitrix, Frostbyte, Codeveda, AETHRA, Yukesong, Hack-Vortex.

TECHNICAL SKILLS

Automation & DevOps: CI/CD, Docker, test automation, REST APIs, Git and GitHub

AI & ML: Neural networks, PyTorch, TensorFlow, scikit-learn, XGBoost, YOLO, OpenCV, OCR

LLMs & Agents: LLM integration, RAG, prompt engineering, agentic tool use, Vertex AI, Gemini

Frontend: Next.js, React, Remotion, TypeScript, Tailwind CSS

Languages & Core: Python, Java, C++, JavaScript, SQL, data structures, DBMS, OOP, FastAPI, Node.js, PostgreSQL

CERTIFICATIONS

- ICP HUB India / IIIT Bengaluru:** Web3 & Blockchain (Internet Computer Protocol) Developer Workshop. Oct 2024
- IBM SkillsBuild:** Project Lifecycle, AI & AI Agents. · **Google Cloud Skill Build:** AI / ML Labs.

EDUCATION

B.E. in Information Science and Engineering

Bangalore Institute of Technology (VTU), Bengaluru

2024 to 2028

CGPA: 9.0 / 10
